

All about wireless communication

A Gopal, Deputy Director, Scientist F, CEERI(CSIR), Chennai, (centre) releasing the souvenir of the workshop on 'Wireless Communication and Radiating Systems' organised by Sri Sairam Engineering College, West Tambaram.

Wireless sensor networks offered vast scope for research projects by engineering students and various research and development organisations were willing to fund such works, according to a senior scientist of Central Electronics Engineering Research Institute (CEERI).

Wireless and Sensor Networks was among the latest developing fields in

communication arena and engineering students and research scholars should seize the opportunity, CEERI Chennai Centre Deputy Director A Gopal said in his valedictory address at a two-day national level workshop on Wireless Communication and Radiating Systems.

The workshop, sponsored by the Council of Scientific and Industrial Research

(CSIR), an autonomous organisation under the government of India, was conducted by the Department of Electronics and Communication Engineering of Sri Sairam Engineering College, West Tambaram.

During the workshop, experts spoke on latest developments in the field of wireless communication and technologies, including GPS.

Dr K M Sivakolundu, Project Director, Coastal Engineering Group, National Institute of Ocean Technology (NIOT), under the Union Ministry of Earth Sciences, inaugurated the workshop, a press release said.

A practical session on Wi Comm T, a new software, was also conducted during the workshop.
