

Climate action plan with local Government

Our institution's Climate Action Plan is dedicated to fostering sustainability, raising climate awareness, and actively involving both the community and educational stakeholders in environmental responsibility. Three key initiatives, **GREEN HOPE - IoT Enabled Smart Hydroponics System Project**, **Mission Life – Lifestyle for Environment** and the **Faculty Development Program (FDP) on Sustainable Development Goals (SDGs)**, recently demonstrated our commitment to this cause. **Green HOPE project** is started in Little Drops Old Age Home, Somangalam Branch, Tharavur to give clean water with smart technology to the people of Somangalam. **Mission Life** engaged over 150 participants, including students, experts, and community members, who benefited through knowledge sharing by various experts on how individuals can adopt a lifestyle that positively impacts the environment. while the **FDP on SDGs, LSDGs, PDI, GDP Preparation** during 29.02.2024 & 01.03.2024. We had around 50 faculty members in attendance, directly benefiting educators and local government representatives. All three programs reflect our institution's active collaboration with community groups and local government, reinforcing its role in regional climate action and sustainability advocacy.
