

TESING & DATA COLLECTION

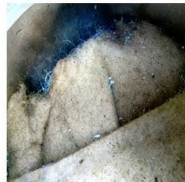

Testing was conducted in the small pond located near Sairam Canteen.

Waste debris from the pond was filtered and examined for results.

Algae and debris was filtered by mechanical filter

Collection of microbes in the Bio-foam.

Sri Sairam Engineering College infrastructure maintain health on aquatic ecosystem. Cleaning Ponds and testing done in ponds with biological process of beneficial (nitrifying) bacteria assimilating nitrogenous waste is natural and occurs in the wild, as well as in pond.
