2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

The curriculum is framed with the inputs and suggestions from various subject experts to provide experiential and participative learning. Student –centric learning is nurtured by providing an ICT enabled campus and IP enabled library facility which provides a platform for students to develop their contemporary skills and ethics to shape their behavior. Faculty employ teaching pedagogical techniques like Lecture with demonstration in laboratories, models/charts animation, Industrial visit, Simulation based training Collaborative learning and Brain storming.

Experiential Learning:

- State of art laboratories have been established for students to impart the experiential learning through Theory to Practice Lectures.
- Live in Lab has been included in the curriculum with 4 credits for the students to come up with an idea in first year, develop into a prototype in second year followed by proof of concept and finally a product.
- Students and staff are encouraged to participate in IIT PALS activities. Institution established e-learning facilities and resources like Swayam Prabha technology Virtual Lab, IIT – B spoken tutorial, NPTEL, Learning Management System, e-books and e-journals, digital library to improve their creative thinking in technical and research fields.
- The Institution has established industry powered centers like Center for Robotics – eYantra, Texas Instruments Innovation Lab, Academies like CISCO/oracle/AWS/salesforce/MicrosoftAzure/Data analytics/Red Hat Linux/TCS Bot Lab/, Oracle, CDAC IoT research lab,
- Research centers like Clean Energy Research center/ Biofuel research center, Material Research Centre, Functional Materials Research Lab, Sairam incubation center, AICTE idea Lab were established to train the students on emerging technologies. Field visits have been organized as an extension of theory beyond classroom teaching.

Participative Learning:

- The Institute in association with professional societies and chapters organize various activities like symposia Hackathon, IEEE Xtreme programming competition, Project expo, Hands-on training for students to participate and solve real world problems.
- Institute in collaboration with IIT PALS, MHRD Institution Innovation council, HCL Technologies, to promote creativity and critical thinking among students through active participation in webinars, project competitions, residential training organized by them.

- Institute tie up with foreign universities like UTP Malaysia and University of Saskatchewan for research internship and attachment programs that equip them to excel in global competitions.

Problem Solving Methodologies:

- Students are encouraged to find out the solutions for real time problems by participating in International Conferences, case studies, Ideathon, Solveathon, Inspiration,hackathon and field/industrial projects.
- Field visits, In-plant training have been organized to make the students learn the industry standards. Internships from renowned industries like Intel Unnati,
- Tutorial classes are conducted for analytical courses in which modern pedagogical tools like group tutorial, collaborative learning are practiced by the students for improving their problem solving ability.
