M.E. / M.Tech. - DEGREE EXAMINATIONS, APRIL / MAY 2024

Second Semester

M.E - CAD/CAM

20PCDEL202 - RELIABILITY IN ENGINEERING SYSTEMS

Regulations - 2020

| Duration: 3 Hours Ma | | | | | . Marks: 100 | | | | |
|---|---|--|----|--------------|--------------|--|--|--|--|
| PART - A $(10 \times 2 = 20 \text{ Marks})$ Answer ALL Questions | | | | K – Level | co | | | | |
| 1. | Defi | ne the term reliability. | 2 | K1 | CO1 | | | | |
| 2. | Sum | marize how hazard rate is estimated. | 2 | K2 | CO1 | | | | |
| 3. | 3. Describe mortality of a component. | | | | | | | | |
| 4. | 4. Define posteriori probability. | | | | CO2 | | | | |
| 5. | 5. Write a short note on empirical methods. | | | | CO3 | | | | |
| 6. | 6. Classify the different types of data collection. | | | | CO3 | | | | |
| 7. | List | the various series and parallel components. | 2 | <i>K1</i> | CO4 | | | | |
| 8. | Brie | fly examine Baye's theorem. | 2 | K2 | CO4 | | | | |
| 9. | Give | a note on accelerated life testing. | 2 | K2 | CO5 | | | | |
| 10. | Nam | e some characteristics of high wear-out. | 2 | <i>K1</i> | CO5 | | | | |
| 11. | a) | PART - B ($5 \times 13 = 65$ Marks) Answer ALL Questions Illustrate the importance regarding the measures of reliability in monitoring. | 13 | K2 | CO1 | | | | |
| | | OR | | | | | | | |
| | b) | Classify the characteristics and functions of a bath tub curve. | 13 | K2 | CO1 | | | | |
| 12. | a) | Demonstrate the importance and different aspects of regarding mortality curve. | 13 | K2 | CO2 | | | | |
| | | OR | | | | | | | |
| | b) | Illustrate the priori and posteriori probabilities with suitable example. | 13 | K2 | CO2 | | | | |
| 13. | a) | Illustrate about grouped data used in failure data analysis. OR | 13 | K2 | CO3 | | | | |
| | b) | Discover the importance of FMEA in reliability. | 13 | K2 | CO3 | | | | |

| 14. | a) | Analyze the m/n configuration in REL functions and analysis. | 13 | K4 | CO4 | | | | | | |
|-----|---|---|----|----|-----|--|--|--|--|--|--|
| | | OR | | | | | | | | | |
| | b) | Evaluate the importance of standby system used in redundancy. | 13 | K5 | CO4 | | | | | | |
| 15. | a) i) | Explain the reliability monitoring techniques with reference to sustainability. | 7 | K2 | COS | | | | | | |
| | ii) | Explain the evolution of condition based monitoring system. | 6 | K2 | CO | | | | | | |
| | OR | | | | | | | | | | |
| | 1.) | | 13 | K2 | CO | | | | | | |
| | b) Examine time terminated model in reliability monitoring. | | | | | | | | | | |
| | | | | | | | | | | | |
| | | $PART - C (1 \times 15 = 15 Marks)$ | | | | | | | | | |
| 16. | a) | Briefly describe the concept of reliability, maintainability and availability. | 15 | K2 | CO | | | | | | |
| | | OR | | | | | | | | | |
| | b) | A module of an automatic machine has 10 components in series. Each component has an exponential time to failure distribution with a constant failure rate of 0.05 per 4000 hours. What is the reliability of each component and the module after 2000 hours of operation? What is the mean time to failure of the module? | 15 | K3 | COC | | | | | | |
